CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.40.5 includes some bug fixes on the ASN non-dim shipment to display correct "Total Volume" CBM in internal application.

3. Projects (none)

4. Bugs Fixes and Changes

4.1 ASN

- **Mantis IDs**: *0004935: [ASN 20] bug: Partially approved ASN populates incorrect "non-dims" Total Volume in Internal App*
  Description of Change: Fix a bug on incorrect "non-dims" total volume value in internal application. The bug was that when a planner approved not all lines of multi-commodity ASN but only approved some of selected commodity line items, this caused "Non-Dims" Total Volume (CBM) in internal app> ConTab>Table B to be populated with full CBM (summarized for all commodity lines) of the origin ASN instead of summarized selected CBM value.

5. Known Bugs and Limitations (none)

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.
