CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.30.0 includes some bug fixes on shipper and planner portals, Internal, and Client application as well as a Key Performance Indicator project (KPI phase 2) for client users. This project provides the ability to enable certain classes of KPIs to client users.

3. Projects

3.1 KPI phase II

- **Mantis IDs:** 3691, 3695, 3709, 3736, 3737, 3785, 3792, 3922, 3946, 3971, 3978, 3979, 3980, 3982, 3983, 3985, 3987, 4010, 4011, 4013, 4015, 4058, 4016, 4064, 4065

Description of Change: Mainly focusing on migration to a new framework for KPI for better functionality and a look and feel for chart, graph, drilldown and report as well as provide more types/classes of KPIs.

- New framework migration
- Top right panel for graphs display value
- Top right panel to represent graph per year by symbol to differentiate years
- Top right panel to display value up to all years graphs comparison
- Display label description for top right panel value
- Update display weekly chart label on X axis to show every 4 week and end with week 52
- Ability to download graphs on top right panel to pdf format
- Provide yearly button in order to display value in year
- Display label description for bottom right panel value
- Display data from KPI earliest date from Jan 1st, 2011
- Use weight value to calculate KPI value from CT2 database
- Display total spend and cost KPI value round to 2 decimals
- Using actual delivery date to identify shipment records to show KPI value for weekly, monthly, quarterly, and yearly for EA DOM (TMS) shipments
- Define and implement user data visibility for KPIs
- Design KPI admin module on internal application to manage drilldown functionality for specific users
- Design KPI admin module on client application to manage Tolerance Level setting
- Left panel drill down functionality with download to excel functionality
- Bottom right drill down functionality with HTML view and download to excel functionality

- Fix issue on KPI form on Internet Explorer 8/9
- KPI: Cost per Unit (available for all MOTs)
 - Cost per pound
 - Cost per kilogram
- KPI: Lead Times (available for all MOTs)
 - Created to delivered
 - Approved to delivered
 - Created to approved
 - Approved to picked up
 - Picked up to delivered
- KPI: Counters (available for all MOTs)
 - Shipment count
 - CT count
 - Total spend

4. Bugs Fixes and Changes

4.1 ASN 2.0

- **Mantis IDs:** 0004035: [ASN 20] ICom/Com re-designs. Add "Reply" functionality

Description of Change: Extend scope of communication center in CT2 to provide "Reply" functionality on the log of message to reply specifically to the specific comment to all possible recipients or selected recipients. This "Reply" functionality is available on internal application "com tab" and client application on "communication center tab" and "com tab" on ASN portals.

- **Mantis IDs:** 0004046: [ASN 20] ICom/Com re-designs. Post-release bug fixes

Description of Change: Resolved bug fixes on Icom and Com tab on internal application, Communication center on client application and ASN.

- **Mantis IDs:** 0004057: [ASN 20] when Container Number is empty, display its order number instead of "none" in View window

Description of Change: Resolved bug fix on container# on "View." It was displayed as "none" when it was supposed to display as (1) or (2) accordingly to assignments the same as display on "Edit."

- **Mantis IDs:** 0004038: *[ASN 20 ph3] add ability to set ASN Portal's default currency/units for Generic Shipper who has his own defaults*

Description of Change: Ability to use inherited default setting for currency, weight unit and dim unit from portal's "PO Issued by". This can be managed per "PO Issued by." The default setting is inherited but can be modified for each user if needed by disabling inherited unit check box for specific user and modify the setting for that particular PO Issued by. If checkbox is checked, fields of currency type and measurement units should be set to Portal's value and become read-only. If checkbox is unchecked, fields of currency type and measurement units should be editable. If Shipper uses Portal defaults then all changes in Portal should be transferred to User Profile settings automatically.

4.2 Misc

- **Mantis IDs:** 0004069: *Update "Sailing Schedule" link in CT2 (Client and Internal)*

Description of Change: This new URL/link has been provided by InfoX web system to update the link with new updated content of website for sailing schedule on CT2 internal and client application.

5. Known Bugs and Limitations (none)

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.
