CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.27.4 includes 1 urgent bug fix for GM Split module.

3. Projects (none)

4. Bugs Fixes and Changes

4.1 GM Split

Mantis IDs: *0003880: [GM Split] bug: unexpected GMS Status*

Description of Change: Resolved a bug in GM Split opening/closing process where the GM Status is changed to "not ready" if a shipment is manually opened, changes made but not saved, and then closed. The fix now prompts a user to save the shipment if it has been modified.

Note that this bug also impacted group shipments. If a shipment in a group is manually opened, not saved, and then closed – this caused discrepancies in the GM Split calculation. This specific issue was also resolved as part of this fix.

5. Known Bugs and Limitations (none)

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.
