## 1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

## 2. About This Release

CyberTrax2 Release 2.33.0 includes refactoring estimation P&L tab to distribute cost across multiple CTs and mainly focus on optimization for web portal and client watch list to improve speed. This release also includes some changes and bug fixes on ASN 2.0, operation on client and internal application, accounting, pdf and report.

## 3. Projects

### 3.1 Optimization

- **Mantis IDs***: 0004310: Optimize Web Portal*

**Description of Change:** Mainly focusing on optimizing code for web portal to improve speed of calculating shipment count on each tab such as new, approve, hold, reject, archive on web portal.

- **Mantis IDs***: 0004353: Optimize Watch List*

**Description of Change:** Mainly focusing on optimizing code for watch list to improve speed of watch list to pre-calculate once a day to load in reasonable amount of time.

### 3.2 Accounting

- **Mantis IDs***: 0004127: Add distribution across multiple CTs / Estimated P&L refactoring*

**Description of Change:** Mainly focusing on refactoring on estimated P&L tab to add distribution across multiple CTs. Adding some columns on both Sales and Cost table with tooltips and calculating vat and currency exchange rate to apply on "save" to use today's date not the created on date. Use distribution logic for sales and purchase table and migrating the logic to distribute automatically. Ability to prevent user from office A to edit table of charge lines that were created by user from office B, this is applied to Est tab and not Sales Invoices table of charges

- **Mantis IDs***: 0004343: (Sales Invoice) Unit related redesign for Table Of Charges*

**Description of Change:** Mainly focusing on changing "Unit" column from read only to editable and expanding the list of Charge Code Units. Managing the list of Charge Code in admin module.

- **Mantis IDs***: 0004375: Add "Populate ETOC from selected CT" function*

**Description of Change:** Ability to fill in Estimated Table of Charge quickly on Sale section.

- **Mantis IDs***: 0004356: [ACC.SI] Prevent users from entering a "negative" amount in invoices (EPLTOC or INVTOC).*

**Description of Change:** Ability to prevent users from entering a "negative" amount in invoices on Est P&L of Table Of Charge or Invoice Table Of Charges.

## 3.3  Operation

- **Mantis IDs***: 0004184: Dbl click on a CT record in any list in the CT2 (Client and Internal) system should open that record in a new browser tab*

**Description of Change:** Double click on a CT record in any list in the CT2 in Client and Internal application; it should open that specific record in a new browser tab

- **Mantis IDs***: 0004322: (Files Tab) Double Click on CTs should open them in new tab.*

**Description of Change:** Double click on any CTs from shipment list, watch list, files, and invoices to open them in the new browser tab. This works for both internal and client application

- **Mantis IDs***: 0004349: Set and update Origin and Destination Countries automatically for ASN records*

**Description of Change:** System sets origin and destination countries automatically for ASN records
