CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.34.2 includes some bug fixes on ASN 2.0 to set default of mode of transportation to Truck-Dom for EA DOM PORTAL to avoid shipper creating shipment(s) with undefined mode as well as displaying correct pick-up location information.

3. Projects (none)

4. Bugs Fixes and Changes

4.1 ASN 2.0

- **Mantis IDs***: 0004443: [ASN 20 ph3] Incorrect Pick-up Location info for ASN records*

Description of Change: Fix the bug of displaying incorrect pick-up location info for ASN records that have pick up location information different than the shipper location. This was caused by saving default of shipper information to pick-up location information once mode of transportation was changed from undefined to truck-dom mode of transportation during the approval process. Now system sets default of mode of transportation for the shipper for truck-dom to avoid shipper creating shipment with undefined mode

5. Known Bugs and Limitations (none)

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.
