CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.42.8 includes some additional filters and output to main report. Add more functionality to save or make a copy of incoming and outgoing files from and to Cargosmart to archived folder. Apply V1 segment in booking request to all EDI 300 messages for all carriers. Ability to transmit a booking request within a saved master shipment information as well as ability for master information to auto-save. Update booking party mapping for a specific office per OOCL's request. Create a log to record info when system receives a 301 EDI message from Cargosmart as well as log a record for an e-mail notification that is sent out to a user who makes a booking request. Add ability to save comment to the master when user clicks "Master Submit" button and add some new type of pallets validation: Standard pallet, mini pallet, and over-packed pallet type. As well as a bug fix on saving filter setting value for scheduled report for "No cancel" and "No transmit to 3PL" filter settings on main report.

3. Projects

3.1 Report

- **Mantis IDs:** 0005028: *[Main report] Add "departure" and "arrival" filters to the "previous" section, "ocean co-loader", "air co-loader" to the output*
Description of Change: Add "Departure" and "Arrival" filters to condition "Previous" section as well as add "Ocean co-loader" and "Air co-loader" to the list of output.

3.2 Cargosmart

- **Mantis IDs:** 0004926: *EDI to CargoSmart - Archive all incoming/outgoing files*
Description of Change: Copy all incoming and outgoing files from and to Cargosmart to archive folder in order to have files available for investigation if needed.
- **Mantis IDs:** 0005025: *EDI to CargoSmart - Mandatory segment V1 in BR (EDI 300) for all carriers*
Description of Change: Change to map a vessel name under V1 segment in booking request EDI 300 for all carriers.
- **Mantis IDs:** 0005026: *EDI to CargoSmart - Send Booking Request only from saved Master*
Description of Change: Ability to send a booking request upon booking transmission on saved master only.
- **Mantis IDs:** 0005034: *EDI to CargoSmart - Auto-save a Master before sending EDI message*
Description of Change: Ability to auto-save master information before transmitting an EDI message.
- **Mantis IDs:** 0005037: *EDI to CargoSmart - Jaguar Office specific mapping of "Bill To Party" in BR*
Description of Change: Change a booking party info mapping in a booking request to associate with a specific office.

- **Mantis IDs:** 0005038: *EDI to CargoSmart - Log for receiving 301 message and for e-mail notification to user who made a booking*
Description of Change: Create a log to record when system receives a 301 message and system sends an email notification to a user (e-mail address) who made a booking request.

3.3 Ops

- **Mantis IDs:** 0005024: *IR > Click to "Master Submit" button should send a comment to a Master*
Description of Change: Ability to add a comment to a master when using "Master Submit" button.

3.4 ASN

- **Mantis IDs:** 0005027: *[ASN 2.0] New pallet type Weight Dims validations*
Description of Change: Change to add some new pallet type weight dim validations for standard pallet, mini-pallet, and over pack pallet.

4. Bugs Fixes and Changes

4.1 Report

- **Mantis IDs:** 0005040: *[Main report] bug: Cannot save "No Cancelled" and "No Transmitted To 3PL" filter options*
Description of Change: Bug fixes on main report under scheduled report in order to save "No Cancelled" and "No Transmitted To 3PL" filter settings.

5. Known Bugs and Limitations (none)

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.
