CyberTrax2™ Release Notes

1. Introduction

This document notes the major new features and changes in this release of CyberTrax2. It also documents known problems and workarounds.

2. About This Release

CyberTrax2 Release 2.25.0 includes a major enhancement to the Client application, minor supporting change to the Internal application (user admin), and two urgent GM Split change requests. This release contains the first production deliverable for the DR/KPI Project.

3. Projects

3.1 DR/KPI

Mantis IDs: *0003595: [DR/KPI] DR3 Phase 1A.1: EA DOM Portal only, Main View only*

Description of Change: Key Performance Indicators (KPIs) are valuable metrics that clients and Jaguar Freight Services (JFS) can utilize to improve their supply chain management operations. These metrics report on cost performance, cycle time performance, load utilization performance, etc.

This release includes the Main View of a new Cost-per-Unit Multi-panel layout. This feature is currently limited to:

- EA DOM Client Company
- Mode of Transportation – Truck Domestic

4. Bugs Fixes and Changes

4.1 GM Split

Mantis ID: *3674 SOW 20 Changes to Consolidated Inv: rename, replace columns, etc*

Description of Change: Cosmetic changes to GMS Consolidated Invoice. Add GRP# column and report invoice amount at GRP level instead of CT level.

Mantis ID: *3675 Discrepancy between P/L, Consol pdf and GMS Log*

Description of Change: Modified individual GMS invoices (located in P/L tab) to generate one invoice per group rather than one invoice per CT. Modified PDF report to be consistent with numbers presented on P/L tab.

Mantis ID: *3678 SOW 21 Changes to GMS Log: add Rev Rec date; create one line per invoice*

Description of Change: Add Revenue Recognition date to GMS Log and create separate line for each consolidated invoice.

5. Known Bugs and Limitations

5.1 DR/KPI

Mantis IDs: *0003595: [DR/KPI] DR3 Phase 1A.1: EA DOM Portal only, Main View only*

Description of Bug/Limitation: There are data issues in CyberTrax2 regarding load plans and weights. This causes a major discrepancy in the Cost based KPIs (Lanes charts). Some of the lanes may report over $1,000/lb due to the fact that CT2 load plans may have a shipment's weight set to 1lb. We will need to resolve the data discrepancies in CT2 production for this chart to report properly. A list of affected shipments will be provided and will consult with business team on further action.

6. Testing

All items have undergone and passed Quality Assurance, Systems Integration, and User Acceptance testing. Please refer to below for list of testers.

Mantis	QA	SIT	UAT	Category
3595	Roma	Alex	Marc	DR/KPI:ph1
3674	Roma	Alex	Mike	GM Split
3675	Roma	Alex	Mike	GM Split
3678	Roma	Alex	Mike	GM Split

Revision History

Version	Date	Summary of Changes	Author	Revision Marks (Yes/No)
0.1	06/26/2012	Initial revision.	Perry Lee	N
0.2	07/03/2012	Added GMS Tasks	Perry Lee	N
0.3	07/06/2012	Added DR/KPI Bugs and Limitations	Perry Lee	N
